*Part-time.

ANNUAL REPORT, 1938.

To the Mayor, Aldermen and Councillors of the County Borough of Dewsbury.
Mr. Mayor, Mrs. Hinchliffe, and Gentlemen,

I have the honour to present to you the report on the health of the County Borough of Dewsbury during 1938.

The Death Rate, 13.3 per thousand, was lower than in the two preceding years, but above that for England and Wales, which was 11.6 per thousand. The Birth Rate, 14.24 per thousand, was lower than in the three preceding years, and also lower than that for England and Wales, which was 15.1 per thousand. Although live births exceed deaths by 49, the Registrar General estimated that the population had declined in a year from 53,050 to 52,860.

Apart from an outbreak of measles, the year was free from epidemics. Heart Disease (191 Deaths), Cerebral Haemorrhage and other Circulatory disorders (115 deaths) and Cancer (93 deaths) were the chief causes of death, and together were responsible for 57% of all deaths. The number of deaths due to Tuberculosis was 22, the lowest number ever recorded in Dewsbury.

Housing conditions continued to receive attention. Following an inquiry, the Minister of Health confirmed 12 clearance orders, involving 208 houses and 618 occupants, and a further 67 individual houses were the subject of demolition or closing orders. During the year, 8 further areas containing 543 houses, with 1,660 occupants, were declared to be clearance areas. The Corporation's building programme was greatly accelerated, and 452 new Corporation houses were completed. Progress was made with the abatement of overcrowding, and at the end of the year the number of families living in overcrowded conditions was half that found at the time of the survey three years previously.

The Maternity and Child Welfare Services continued to be used increasingly. Over 92% of the women confined during 1938 either engaged Municipal Midwives or were admitted to Moorlands Maternity Home or Staincliffe County Hospital under the Corporation's Maternity Scheme. Further, 86% of expectant mothers attended ante-natal clinics, and 86% of children under one year of age attended infant welfare centres. The cost of maintaining these services is considerable, but it should be realised that they are associated with marked improvements in the health of mothers and babies. There has been in recent years a steady fall in the maternal mortality rate, the still-birth rate, and the infant mortality rate. In 1938, the still-birth and infant mortality rates were the lowest ever recorded in Dewsbury.

An explanation rather than an apology is required for the delay in the publication of this Report. Towards the end of 1938, Dr. A. T. Elder, who for three years had given valuable service as Assistant Medical Officer of Health, left to take up a new appointment, and almost four months elapsed before his successor arrived. Much time had to be devoted in the early part of this present year to the preparations for a large housing inquiry, which eventually was held a few days after instructions had been received from Whitehall urging local authorities to devote all their energies to the completing of Air Raid Precautions. The work of a Public Health Department is concerned largely with matters that demand immediate attention and with the provision of services that are required whether the country is at peace or preparing for war. The organisation of Casualty Services constitutes an important branch of Air Raid Precautions, and this duty, which has been imposed upon Public Health Departments, accordingly is not in substitution for, but in addition to the normal work. This report, therefore, has had to be written at odd moments, a fact which its perusal will make only too obvious.

I wish to thank the staff of the department for the loyal assistance they have given. I also wish to express my thanks to the Members of the Council, and particularly to the Chairmen and Members of the Health and Housing Committees for their courtesy and help.

I have the honour to be,

Your obedient Servant,

J. F. GALLOWAY,

Medical Officer of Health.

DEWSBURY MATERNAL MORTALITY RATES.
OVERLAPPING QUINQUENNIA.

Quinquennium.		Maternal Mortality Rate (Per 1,000 Total Births)
1924-1928	...	4.93
1925-1929	...	4.39
1926-1930	...	4.37
1927-1931	...	5.32
1928-1932	...	5.30
1929-1933	...	5.45
1930-1934	...	5.07
1931-1935	...	5.14
1932-1936	...	4.17
1933-1937	...	3.70
1934-1938	...	3.21

Population.

The estimated population has declined from 53,050 to 52,860, a decrease of 190. In the census of 1911, Dewsbury had a population of 53,411, in 1921 a population of 54,165, and in 1931, a population of 54,410.

The chief occupations in Dewsbury are the woollen trade and its associated industries, shop work and the distributive trades, colliery work, and cleaning and dyeing.

Birth Rate.

In 1938, the number of live births decreased by 52 from 805 to 753, giving a birth rate of 14.24 per 1,000 compared with the previous year's rate of 15.17. The birth rate for England and Wales was 15.1. The birth rate for Dewsbury is lower than in the three preceding years.

If the population of the country is to be maintained, every 100 women must produce during their child-bearing years sufficient girl babies to grow up to become another 100 potential mothers. In 1881, every 100 women produced 150 potential mothers. In 1901, every 100 women produced 125 potential mothers. To-day, every 100 women produce approximately 75 potential mothers. The number of children born to-day is quite insufficient to replace the ageing parents.

It is difficult to get people to regard this serious position with any great concern, because the population is not yet declining. When, however, the age-distribution of the population is examined, the results of the low birth rates in recent years become manifest. In 1881, the number of people in the country under 20 years of age was 6 times the number over 60 years of age. In 1931, the number under 20 years of age was 3 times the number over 60 years of age. To-day, the number of people under 20 years of age is twice the number over 60 years of age. Unless a marked increase in the birth rate occurs, in 25 years time those under 20 years of age will no more than equal those over 60 years of age.

Quantitatively, it is estimated that to replace the ageing population, it is necessary for families to consist of four children, and certainly not less than three children. Qualitatively, it is undesirable that those parents whose children would most likely grow up to be intelligent and valuable members of the community should be discouraged by economic difficulties from having them.

Deaths.

The number of deaths in 1938 was 704, a decrease of 81 compared with the previous year, and the Death Rate was 13.3 per thousand. The Dewsbury Death Rate in 1937 was 14.8 per thousand, and for the period 1920-1938 was 14.4 per thousand.

The principal causes of death, accounting for 86% of all deaths were :—

- (1) *Heart disease.* There were 191 deaths (27.1% of all deaths) from this cause. This is a decrease of 11 on the previous year.
- (2) *Cerebral Haemorrhage (apoplexy), Aneurysm, and other Circulatory disorders.* There were 115 deaths (16.7% of all deaths) from these causes. This is an increase of 1 on the previous year.
- (3) *Cancer.* There were 93 deaths (13.2% of all deaths) from this cause. This is a decrease of 9 on the previous year.
- (4) *Acute and chronic Nephritis.* There were 49 deaths (7.0% of all deaths) from nephritis. This is an increase of 22 on the previous year.
- (5) *Pneumonia.* There were 29 deaths (4.1% of all deaths) from this cause. This is a decrease of 7 on the previous year.
- (6) *Suicide and Violence.* There were 29 deaths (4.1% of all deaths) from these causes. This is the same as in the previous year. There were 8 suicides and 21 accidental deaths.
- (7) *Senility.* There were 29 deaths (4.1% of all deaths) from this cause. This is an increase of 1 on the previous year.
- (8) *Tuberculosis.* There were 22 deaths (3.1% of all deaths) from this cause. This is a decrease of 8 on the previous year.
- (9) *Premature birth, congenital debility, malformations, etc.* There were 19 deaths (2.7% of all deaths) from these causes. This is a decrease of 11 on the previous year.
- (10) *Diabetes.* There were 15 deaths (2.1% of all deaths) from this cause. This is an increase of 7 on the previous year. They were all with one exception persons aged 55 years or over.
- (11) *Bronchitis.* There were 14 deaths (2.0% of all deaths) from this cause. This is a decrease of 7 on the previous year.

There were 13 fewer deaths in children under 5 years of age, 37 fewer deaths between 5 and 45 years of age, 23 fewer between 45 and 65 years of age, and 8 fewer deaths over the age of 65 years, compared with the previous year.

Standardised Death Rate.

Before the death rate of Dewsbury can be compared with that of England and Wales, consideration must be given to the fact that its population differs slightly in age and sex distribution from the rest of the country. In the case of Dewsbury, this

distribution favours a lower death rate. The Registrar-General, however, supplies a "Comparability Factor" which for Dewsbury is 1.03 and when the Dewsbury death rate is multiplied by the "Comparability Factor," a "Standardised Death Rate" of 13.7 per 1,000 is obtained, which can be compared with the rate for England and Wales which was 11.6 per thousand.

Typhoid and Paratyphoid fevers.

As in the previous year, there were no deaths from these causes.

Small pox.

As in the previous year, there were no deaths from this cause.

Measles.

There were 7 deaths from measles, giving a death rate of 0.13, compared with the previous year's rate of 0.00 per 1,000. The rate for England and Wales was 0.04 per 1,000.

Scarlet Fever.

The death rate was 0.02 per 1,000 the same as in the previous year. The rate for England and Wales was 0.01 per 1,000.

Whooping Cough.

The death rate was 0.00 per 1,000, a decrease on the previous year's rate of 0.06 per 1,000. The rate for England and Wales was 0.03 per 1,000.

Diphtheria.

The death rate was 0.04 per 1,000, a decrease on the previous year's rate of 0.17 per 1,000. The rate for England and Wales was 0.07 per 1,000.

Influenza.

The death rate was 0.08 per 1,000, a decrease on the previous year's rate of 0.49 per 1,000. The rate for England and Wales was 0.11 per 1,000.

Infant Mortality Rate.

This, which is expressed as the number of deaths of children under 1 year of age per 1,000 live births, was 51.2, a decrease on the previous year's figure of 62.1. The rate for England and Wales was 53 per 1,000 live births.

Maternal Mortality Rate.

This, which is expressed as the number of maternal deaths per 1,000 total births (live and still) was 3.83 compared with 2.4 in the previous year. The rate for England and Wales was 2.97 per 1,000 births (live and still).

Unemployment.

The following are the figures for the number of registered unemployed in Dewsbury in the first week of each quarter in 1938 :—

Quarter Commencing	Totally unemployed	Temporarily suspended, or working short time	Total	Percentage unemployed
Jan., 1938 ...	1742	2312	4054	18.4
April, 1938 ...	1926	2285	4211	19.1
July, 1938 ...	1910	1828	3738	16.9
Oct., 1938 ...	1921	1618	3539	16.1

The average for the four quarters of the percentages unemployed is 17.6%. The figures for previous years were :—

1937	11.8%
1936	12.8%
1935	20.7%
1934	20.6%
1933	22.5%

SECTION B.

GENERAL PROVISION OF HEALTH SERVICES FOR THE AREA.

Staff.

Particulars of the Public Health Officers of the County Borough are printed on pages 6 and 7.

Laboratory Facilities.

Bacteriological work is carried out at the Public Health Department Laboratory, Dewsbury, and at the West Riding County Council Laboratory, Wakefield, and details of the work are given in Tables II. and III., page 49.

Chemical analyses are carried out by the Borough Analyst, a report of whose work is given in Tables IV. and XXII., pages 50 and 70.

Ambulance facilities.

(a) Infectious cases.

The Dewsbury Joint Hospital Board provides 2 ambulances.

(b) Non-infectious and accident cases.

Three motor ambulances are in use, one provided by the St. John's Ambulance Brigade, stationed at Ravensthorpe, and 2 by the Dewsbury Corporation, stationed at the Central Police Station.

The Dewsbury St. John's Ambulance Brigade propose to purchase an ambulance, which will be stationed in Dewsbury. So far, the project has not materialised, but if it does, it will be a useful addition to the present facilities.

Nursing in the Home.

(a) The County Borough has made no arrangements for the home nursing of cases of infectious disease.

(b) The Dewsbury Nursing Association, of which Mrs. Kendall is the Honorary Secretary, provides effectively for the home nursing needs of the town, and in cases of necessity makes no charge. Seven nurses in the service of the Association paid 19,629 visits to 552 individual patients during 1938. District collections constituted over 70% of the Association's income.

For some time it had been felt that the work of the Association would be more efficiently carried out if the nurses lived together in a hostel, and their work directed by a Supervisor. The late Dr. J. W. Applegate was a strong advocate of such a scheme, and although he died before its completion, he took an active part in its early stages. The Association purchased two houses in Highgate Road, Leeds Road, which have undergone extensive alteration, and have been suitably furnished, and the Association now possess a hostel of which it can justifiably be proud.

The Association is not in any way associated with or dependent upon the Local Authority, although the Mayor of Dewsbury is President of the Association, and the Medical Officer of Health is Chairman of its Executive Committee.

Clinics and Treatment Centres.

Particulars of these are printed in Table V., page 51. The Section on Maternity and Child Welfare, page 20, describes the work done at the Maternity and Child Welfare Centres.

Hospitals.

(a) DEWSBURY AND DISTRICT GENERAL INFIRMARY.

This hospital, opened in 1876, with 8 beds, had in its first year an expenditure of £1,040. In 1938, the hospital which has now grown to 100 beds, treated 2,045 in-patients, with an average number of 87.5 beds occupied. The number of operations performed was 1,906, and over 80,000 attendances were made in the out-patient and other departments. The total expenditure for the year was £19,757 and the total ordinary income was £18,457.

There continues to be close co-operation between the Infirmary and the Corporation. During the year ending March 31st, 1939, the Dewsbury Corporation made their annual subscription of £500, the Education Committee paid £434 (mainly for orthopaedic treatment and the treatment of tonsils and adenoids), the Health Committee paid £413 for the treatment of Venereal Diseases, and £66 for X-Ray examinations of tuberculosis patients, and the Maternity and Child Welfare Committee paid £30, mainly for the maintenance of patients. These payments constituted about 8% of the Infirmary's ordinary income. In addition, the Medical Officer of Health has been appointed Honorary Medical Officer in charge of public health services at the Infirmary.

The demands for more and better hospital accommodation, coupled with a general increase in the cost of maintenance have severely strained the finances of voluntary hospitals in recent years. As charitable sources have failed to supply the increasing amount of money required, these hospitals have been compelled to call upon those they treat to pay in one form or another, for the benefits they receive. These payments may be made directly by the patients to the hospitals for services rendered, or they may be made indirectly through voluntary contributory schemes, approved societies, or by contributions from the local rates.

In the provinces the average amount of the ordinary income of a voluntary hospital which is derived directly or indirectly from patients is about 57%. When the ordinary income of the Dewsbury Infirmary is analysed, an approximately similar percentage is found to be derived from patients, as the following table shows:—

Item	Source	Amount	% of income
I.	Subscriptions	£2199	11.9
II.	Donations, Collections, Hospital Days, Rose Days, Childrens' Ward Fund, Grateful Patients ...	3311	17.9
III.	Contributory Scheme ...	6687	36.2
IV.	Patients' payments, private patients, Approved Societies ...	1431	7.8
V.	Public Services—V.D., etc. ...	1408	7.6
VI.	Investments	3094	16.8
VII.	Other receipts—Road Traffic Act, Superannuation Fund and Sundries	327	1.8
		£ 18457	100.0

Items III., IV., and V., representing payments made directly or indirectly by patients amount to 51.7% of the income, and when to this are added the sums of £500 which is the Corporation's annual subscription and £205 which is the West Riding's annual subscription (included under Item II.) the figure becomes 55.5%.

(b) INFECTIOUS DISEASES HOSPITAL, MITCHELL LAITHES.

This hospital, controlled by the Dewsbury Joint Hospital Board, now contains 98 beds, including 14 in the discharge block, and 8 in the cubicle block. There is now accommodation for the treatment of all infectious diseases. The Dewsbury Corporation pays approximately 80% of the cost of maintaining the hospital.

(c) COUNTY HOSPITAL, STAINCLIFFE.

This hospital is administered by the West Riding County Council. The destitute sick and other Dewsbury residents who require hospital treatment are admitted, and in 1938, Dewsbury residents constituted 17.6% of the total admissions.

The West Riding County Council contemplate expending a sum of over £50,000 in bringing the hospital up to a high standard of efficiency, an expenditure which will, no doubt, be reflected in the cost of maintenance of patients.

The arrangement made in 1935 continues to be in operation whereby patients wishing to enter Moorlands Maternity Home, but for whom there is no accommodation, can be admitted directly to the County Hospital, without reference to the Public Assistance Officer. During 1938, 98 mothers availed themselves of this arrangement, compared with 51 in the previous year, showing that the demand for institutional midwifery continues to grow in Dewsbury.

(d) WHITLEY SANATORIUM.

This Sanatorium, belonging to Dewsbury Corporation, has accommodation for 32 patients. The beds continue to be fully occupied, but patients can be admitted usually with little delay. During 1938, 25 men, 22 women, and 5 children were admitted, making a total of 52. During the same period, 46 were discharged and 4 died.

(e) MOORLANDS MATERNITY HOME.

This institution, belonging to the Corporation, continues to admit as many cases as its 11 beds will allow. During the year, the extensions have made considerable progress towards completion, and during 1939, the extended home, with 26 beds should be opened for the reception of patients. Some of the beds will be reserved from ante-natal cases, and the remainder should provide accommodation for 450 midwifery cases a year. In view of the increasing number of mothers in Dewsbury who seek institutional midwifery accommodation, the home is likely to be well filled as soon as the extensions are completed, and it is extremely unlikely that they will prove to have been carried out on too ambitious a scale.

Public Assistance.**INSTITUTIONAL MEDICAL SERVICES.**

The administration of the institutional medical services transferred from the late Board of Guardians under the powers of the Local Government Act, 1929, is, so far as Dewsbury is concerned, under the control of the West Riding County Council.

POOR LAW MEDICAL OUT-RELIEF.

The administration of Poor Law Medical Out-Relief is carried out by the four part-time District Medical Officers, each of whom has a separate district. The districts and officers are :—

Dr. G. H. L. Hammerton.—St. John's East, St. John's West, Trinity North, Trinity South, and All Saints' Wards. Area 2,179 acres. Population 27,122.

Dr. H. B. Oliver.—Ravensthorpe Ward. Area 372 acres. Population 6,594.

Dr. E. G. Mahoney.—Earlsheaton Ward. Area 563 acres. Population 8,004.

Dr. G. R. Sunley.—Thornhill North and Thornhill South Wards. Area 3,606 acres. Population 11,140.

The duties are laid down by the Public Assistance Order, 1930, and include attending all poor persons within the district requiring medical attendance, supplying necessary medicine, informing the Relieving Officer of any person attended without an order, keeping records and supplying returns, giving reports on cases, and providing a deputy. Cases may attend at the surgery or be visited at their homes. The receipt of out-relief is not a necessary qualification for medical relief, which may be

given apart from any other relief. Every aged, infirm, permanently sick or disabled person granted permanent relief receives a card entitling him to the attention of the District Medical Officer, and before out-relief can be granted on grounds of sickness a certificate must be obtained from that officer.

LOCAL GOVERNMENT ACT, 1929.

The administrative scheme for Dewsbury under the above Act declared that all assistance to necessitous persons in the following groups would be given other than as poor relief.

(a) The provision of hospitals for the reception of persons suffering from notifiable infectious diseases.

(b) The provision of milk or other food for expectant or nursing mothers and children (under five), medically certified to need additional nourishment.

(c) The provision of domiciliary assistance to Blind Persons.

(d) The provision of sanatoria and hospitals for the treatment of all forms of Tuberculosis.

The functions of the Public Assistance Committee in so far as they relate to :—

- (1) The domiciliary relief of the sighted dependants of blind persons
- (2) The domiciliary care of mentally defective persons; shall be discharged on behalf of and subject to the general direction and control of the Public Assistance Committee, as to (1) by the Blind Persons Act Sub-Committee of the Education Committee, and as to (2) by the Mental Deficiency Committee of the Council.

CARE OF MENTAL DEFECTIVES.

Institutional Provision.

At the end of 1938, there were 45 mental defectives who were maintained in institutions, wholly or partly, by the Dewsbury Corporation. This represents an increase of 4 cases in the year, accounted for by the death of one patient in an institution, and the admission of 5 new cases to institutions.

Extensions at St. Catherine's Institution, Doncaster (maintained by the South West Yorkshire Joint Board, of which Dewsbury is a constituent member) were completed during the year, resulting in an increase from 34 to 48 in the number of beds allocated to Dewsbury. When these extra beds became available 4 Dewsbury cases maintained in other institutions were transferred to St. Catherine's, and 6 new cases were also admitted, although one of these, a Dewsbury girl from the Borstall Institution at Aylesbury, had subsequently to be transferred to the Rampton State Institution for Defectives, owing to her behaviour. At the end of 1938, of the 45 defectives maintained by Dewsbury, 40 were in St. Catherine's where another 8 beds were available. (It should be added that since the year ended, 4 further transfers, and 3 new admissions have reduced the unoccupied beds at St. Catherine's to 1).

In addition, the following institutions contained Dewsbury patients :—

- Whittington Hall, Chesterfield—2 patients (both subsequently transferred to St. Catherine's).
- Hortham Colony, Bristol—1 patient (subsequently transferred to St. Catherine's).
- Royal Albert Institution, Lancaster—1 patient (subsequently transferred to St. Catherine's).
- Etloe House, Leyton—1 patient.

Guardianship.

There were 16 cases (6 Males and 10 Females) under guardianship, of whom 11 were with guardians who were relatives. The number under guardianship represents a decrease of one, compared with the previous year. During the year, 4 new cases were placed under guardianship, 1 died, and 4 were transferred to St. Catherine's Institution, Doncaster.

Supervision.

There were 38 cases (28 Males and 10 Females) under Statutory Supervision. This represents a decrease of 7 on the previous year. Although 3 new cases were placed under Statutory Supervision, transfers to Institutions and guardianship accounted for the reduction.

Occupation Centre.

The centre, for uneducable children and adult defectives, is held at the Municipal Buildings from 9 a.m. to 4 p.m. on School-days, and is staffed by a Supervisor, who is also Mental Health Visitor, and an assistant. Those in attendance receive free of charge hot dinners and milk.

The older defectives assist in cooking and other domestic work. In addition to the normal activities of the centre, visits to the cinemas are made, small parties and a Christmas Tea and Entertainment are given and 14 of the defectives went to Cowden Camp for a week's holiday in the summer.

Dinners are prepared at the centre for tenants who are being removed under the slum clearance schemes, and during the year 1,280 such dinners were provided.

The number of cases on the register at the end of the year was 10 (2 Males and 8 Females). During the year 468 sessions were held and 4,212 attendances were made.

MATERNITY AND CHILD WELFARE.

The work of this Department continues to grow. This can be demonstrated most briefly by giving actual figures. The appended table, which covers the last 10 years shows the number of births in Moorlands Maternity Home and in Staincliffe County Hospital (under the Council's scheme) and the number of births attended by Municipal Midwives. The figures in brackets show what percentage the numbers they follow are of the total births in the Borough :—

Year	Institutional Confinements			Municipal Midwives	Total of Institutions & Midwives
	Moorlands	Staincliffe	Total		
1929	198 (23.1)	—	198 (23.1)	—	198 (23.1)
1930	236 (25.8)	—	236 (25.8)	—	236 (25.8)
1931	245 (31.3)	—	245 (31.3)	—	245 (31.3)
1932	260 (31.2)	—	260 (31.2)	—	260 (31.2)
1933	277 (34.1)	—	277 (34.1)	—	277 (34.1)
1934	295 (38.0)	—	295 (38.0)	—	295 (38.0)
1935	303 (37.2)	15 (1.8)	318 (39.0)	—	318 (39.0)
1936	291 (35.0)	27 (3.2)	318 (38.2)	—	318 (38.2)
1937	299 (35.4)	51 (6.0)	350 (41.4)	126 (14.9)	476 (56.3)
1938	299 (38.1)	98 (12.5)	397 (50.6)	325 (41.5)	722 (92.1)

In 1938, in nine out of every ten babies born, the mother had availed herself of services provided by the Council.

Statistics and details relating to Maternity and Child Welfare are printed in Tables VII. to XIII., pages 53 to 60.

Ante-Natal Clinics.

Two ante-natal clinics weekly are conducted by Dr. E. Dorothy Shaw. One clinic is held at Moorlands Maternity Home, and is reserved for patients who have arranged to be confined at the Maternity Home. The other clinic is held at the Municipal Buildings. Altogether 708 individual mothers made 1,631 attendances, which means that 86% of the expectant mothers availed themselves of the facilities put at their disposal. The Municipal Midwives attend the clinic when their patients are examined.

It is anticipated that before another year is ended, the ante-natal clinics will be doubled in number, which will be made possible by an increase in the Medical Staff of the Department, and this will enable the patients to be seen more frequently.

Domiciliary Midwifery.

The four Municipal Midwives attended 325 cases during the year. Midwives in private practice attended 9 cases.

There were 121 calls from Midwives (including the staff of the Maternity Home) for Medical Aid, the conditions for which assistance was required being :—

Ante-Natal Conditions	5
Ante-partum Haemorrhage	8
Abnormal Labour	18
Ruptured Perineum	41
Post-partum Haemorrhage	6
Illness of Mother	6
Puerperal Pyrexia	2
Anaesthetics	2
Illness or prematurity of infant	33

Maternal Mortality.

Three Maternal Deaths occurred during the year.

Case 1. was a single woman aged 23 years. She died of Septicaemia following Septic abortion. There was not sufficient evidence to show how the abortion was caused.

Case 2 was a single woman aged 32 years, who in childhood had suffered from Epilepsy, and was partly paralysed. She made a full physical recovery but was mentally backward. She attended an Ante-Natal Clinic on 8 occasions during the last $2\frac{1}{2}$ months of her pregnancy. She died in hospital of obstetric shock shortly after the birth of twins.

Case 3 was a single woman of 37 who suffered from heart disease. She attended the Ante-Natal Clinic and was referred to hospital where she died of Pulmonary Oedema and Eclampsia, with heart disease as a contributory factor.

The Maternal Mortality Rate was 3.83 per 1,000 total births, which is above the previous year (2.4) when only two maternal deaths occurred. During the five years 1934-1938, the rate is 3.21, and the figures below show how Dewsbury has compared with England and Wales during that time.

	1934	1935	1936	1937	1938
England and Wales ...	4.42	3.94	3.65	3.13	2.97
Dewsbury ...	3.87	3.68	2.4	2.4	3.83

Still Births.

Still births numbered 31, giving a rate of 39.5 per 1,000 total births, the lowest figure ever recorded in Dewsbury. It will be interesting to see whether the increased employment of women which the present improvement in industry has led to, will be associated with an increase on the number of still-births.

Auxiliary Maternity Services.

(a) CONSULTANT SERVICES FOR ANTE-NATAL, OBSTETRIC AND GYNAECOLOGICAL CASES.

The services of consultants, available either in the patient's home or at Moorlands Maternity Home, are being utilized increasingly by medical practitioners. These services were used on 2 occasions in 1935, 4 occasions in 1936, 13 occasions in 1937, and on 19 occasions in 1938.

(b) PROVISION OF HOME HELPS.

The services of Home Helps were utilised on 4 occasions in 1938, compared with 8 occasions in 1937. Although they are available at lower charges than formerly, the demand appears to be very limited in Dewsbury.

(c) PROVISION OF STERILIZED MATERNITY OUTFITS.

These outfits, provided for the convenience of patients and to reduce the risk of sepsis, are obtainable from the Public Health Department, at a cost which takes into account the patient's income. The full cost of the outfit is 6/-.

The number supplied in 1938 was 84 of which 75 were supplied free.

(d) CONVALESCENT HOME TREATMENT FOR MOTHERS AND BABIES.

This is available at the Yorkshire Homes for Mothers and Babies at Harrogate and Withernsea. Mothers with babies over 3 weeks and under 7 months are eligible, and the usual duration of stay is 14 days. The charges to the Corporation are 35/- a week, plus railway fare, for a mother and baby, and 25/- a week, plus railway fare, for a mother alone. During 1938, 28 mothers and babies went to these homes, and in all these cases the family income was so low that no charge was made.

(e) FREE MEALS FOR EXPECTANT AND NURSING MOTHERS.

The meals are supplied to necessitous expectant and nursing mothers who are recommended by the Medical Officer of Health to require such meals.

During 1938, 185 meals were supplied to 8 mothers at a cost to the Corporation of 1/- per meal. In 1937, 163 meals were supplied to 15 mothers.

(f) DENTAL TREATMENT FOR EXPECTANT AND NURSING MOTHERS

During the year, 84 mothers received treatment at a cost to the Corporation of £15, to which must be added a proportion of a School Dental Surgeon's Salary, amounting to approximately £40, bringing the total cost to £155.

Moorlands Maternity Home.

The demand for accommodation in the Maternity Home increasingly exceeds that available, and this year 98 cases who could not be accommodated were admitted to the County Hospital, Staincliffe, under the Maternity and Child Welfare Committee's scheme.

The number of patients admitted to Moorlands Maternity Home was 299, representing 38.1% of the total births in the borough. Of these cases, 293 were delivered by the resident midwives, and 6 by doctors.

The following table shows the number of cases admitted to institutions for confinement since the opening of Moorlands in 1924 :—

	Moorlands	Staincliffe	Total
1924	6	—	6
1925	174	—	174
1926	213	—	213
1927	175	—	175
1928	192	—	192
1929	198	—	198
1930	236	—	236
1931	245	—	245
1932	260	—	260
1933	277	—	277
1934	295	—	295
1935	303	15	318
1936	291	27	318
1937	299	51	350
1938	299	98	397

This table shows that the extended home, which will be completed in 1939, capable of dealing with about 450 confinements, will not be too large for the needs of the town.

Dewsbury Day Nursery.

This is a voluntary institution to which the Dewsbury Corporation contribute £300 annually. The President is Miss H. B. Walker, J.P., and the Honorary Secretary is Miss Hilda Lee, A.R.C.C. There is accommodation for 15 boarders and 35 children in daily attendance. The total number of attendances of children at this nursery was 2,850 full days, and 172 half-days.

Post-Natal Clinic.

This clinic is held at the Municipal Buildings in conjunction with the ante-natal clinics. During the year, 18 patients made 44 attendances, and while this is a considerable increase over the previous year, there is still room for this clinic to grow to much larger proportions.

Infant Welfare Centres.

Four Infant Welfare Centres are held weekly, situated respectively in the Municipal Buildings, Thornhill Council Offices, Earlsheaton Council Offices, and Ravensthorpe Council Offices.

The attendances at the various Clinics were :—

Dewsbury	10961
Thornhill	6618
Ravensthorpe	7819
Earlsheaton	6447
			31845

These attendances continue to increase. In 1934, they numbered 21,713, in 1935, 25,653, in 1936, 29,398, and in 1937, 29,979. The number of children who first attended the centres during the year, and who, on the date of their first attendance, were under one year of age was 685, representing 86% of the notified live births.

The amount of milk foods distributed at the centres was 43,647 lbs. of which 23,856 lbs. or 55% was distributed free, compared with 39,059 lbs. in the previous year of which 20,253 lbs. or 52% was distributed free.

The total cost of the milk foods distributed during the year was £2,545 of which parents paid £985 and the Corporation £1,560.

Infant Mortality Rate.

The number of infants who, in 1938 died under the age of one year was 39, giving an Infant Mortality Rate of 51.2 per 1,000 live births, the lowest ever recorded in Dewsbury. The following table shows how the rate has declined in Dewsbury, as well as England and Wales generally:—

	Rate per 1,000 live births		
	Dewsbury	England	and Wales
1910	...	147	117 (1906-1910)
1911-1915	...	124	110
1916-1920	...	105	90
1921-1925	...	101	76
1926-1930	...	75	68
1931-1935	...	73	62
1936	...	68.5	59
1937	...	62.1	58
1938	...	51.2	53

It is gratifying to realise that while, in 1910, only 17 out of every 20 children survived until their first birthday, to-day, 19 out of every 20 survive.

Of the 39 children who died, 59% were under one month old, a fact which is accounted for by 19 deaths being due to congenital debility, premature birth and malformations.

Health Visitors.

The four Health Visitors, whose duties consist principally in assisting at Clinics and the home visiting of expectant and nursing mothers and children under school age, paid 593 visits to expectant mothers, 4,915 visits to children under one year of age, and 11,588 visits to children between one and five years of age, making a total of 17,096 visits during the year.

Child Life Protection.

The supervision of foster-children is regulated by Sections 206 to 220 of the Public Health Act, 1936. These sections relate to any person other than a relative or legal guardian who undertakes for reward the nursing and maintenance of a child under

nine years of age apart from its parents, even if the child is cared for only during the day-time. The Day Nursery is exempted from the provisions of the Act, along with boarded-out children, publicly maintained schools, hospitals and institutions, and institutions maintained wholly or partly by voluntary contributions.

The four Health Visitors act as Child Protection Visitors, and at the end of the year there were eight persons receiving eight children for reward whom the visitors were supervising.

Orthopaedic Treatment.

Children suffering from orthopaedic defects who attend the Infant Welfare Centres are referred to the Dewsbury and District General Infirmary if they have not already been referred there by private practitioners.

During the year, six children not already undergoing treatment were referred to the Infirmary from the Centres.

Birth Control Clinic.

This Clinic is run in conjunction with the Ante-natal Clinic held at the Municipal Buildings, Halifax Road. During the year 5 patients attended for advice, compared with 11 in the previous year.

Nursing Homes.

There are no Nursing Homes in Dewsbury registered under Section 187 of the Public Health Act, 1936, and no applications for registration were received during the year.

SECTION C.

SANITARY CIRCUMSTANCES OF THE AREA.

WATER.

There are two sources of water supply. The Thornhill Ward of the Borough and the Dewsbury portion of Soothill Upper are supplied from the Halifax Waterworks; the remainder of the Borough is supplied by the Dewsbury and Heckmondwike Waterworks Board. In 1938, a supplementary supply was obtained temporarily from the Batley Corporation.

The Board has 5 impounding reservoirs at Dunford Bridge, a storage reservoir and treatment plant at Broadstone, and a storage reservoir and meters at Whitley. The distance from Dunford Bridge Reservoir to Staincliffe along the course of the water is $19\frac{1}{4}$ miles.

The total available capacity of the Reservoirs when full is 705 million gallons. The 5 impounding Reservoirs at Dunford Bridge contain 579 million gallons, and the 2 Storage Reservoirs together contain 126 million gallons. The whole of the 705 million gallons is not available for the Town's use however, as 240 million gallons is contained at levels too low for delivery into the conduit. The latter is intended for use as compensation water, and is discharged into the River Don for the benefit of mill owners and others.

The source of all the water is, of course, the rainfall upon the gathering grounds, which during the last 77 years from 1862 to 1938 inclusive, has maintained a yearly average of 50.75 inches. In 1938 it amounted to 53.1 inches. The highest and lowest amounts in any one year have been 68.41 inches in 1877, and 30.24 inches in 1887 respectively.

The rate of consumption for domestic purposes in 1938 was 20.0 gallons per head per day.

A satisfactory water supply firstly must be safe for drinking and domestic purposes, free from bacteria likely to cause infection or poisons likely to injure the users. Secondly, it must be pleasant to use, with an absence of taste, smell, colour or sediment. Finally, it must be suitable for industrial and domestic purposes, with an absence of undue hardness, or an excess of iron. The nature of the collecting grounds of all water supplied to Dewsbury prevents both undue hardness and an excess of iron.

Two Tables are given below, the first of which shows a summary of the Bacteriological Reports made during the year 1938, whilst the second shows the more important physical and chemical properties, extracted from a chemical analysis made in May, 1938.

TABLE I.

Source of Water	Number of Samples. B. Coli per 100 ml.			
	None	1—2	3—10	over 10
Dewsbury & Heckmondwike Waterworks Board	23	2	—	3
Halifax Corporation	16	1	1	2
Batley Corporation	7	4	1	1

TABLE II.

The Physical and Chemical properties of typical samples of water taken on the 9th May, 1938.

No. 1.—Water supplied by Dewsbury & Heckmondwike Waterworks Board.

No. 2.—Water supplied by the Halifax Corporation.

pH. Value	...	7.8	6.8

The presence of *Bacillus Coli* (usually spoken of as "B.Coli") and whose normal abode is the intestines of animals, including man, indicates that the water has been subjected to contamination by animals, which may or may not have been human beings, and the water is accordingly viewed with suspicion, varying in degree to some extent with the frequency with which B.Coli occur. If B.Coli are absent from 100 ml. (or cubic centimetres) the water can be regarded as very pure from the point of view of animal contamination. Should B.Coli be found in 1 ml. of water, the water is unfit for use, as there is a degree of animal contamination, which may be of human origin, likely to permit of epidemics due to infection from the water supply.

Between these extremes, there are waters with varying degrees of contamination by B.Coli, and the question of their safety can be decided only after an investigation of the degree of contamination, and of its likely source.

A study of the Bacteriological Reports (Table I.) shows that of the 28 samples examined in the case of water from the Dewsbury & Heckmondwike Waterworks Board, 23 samples were free from B. Coli, 2 samples showed 1—2 B. Coli per 100 ml. and 3 samples showed more than 10 and suggest that the highest standard of purity is not always maintained.

In the case of the Halifax water, Table I. shows that of the 20 samples examined, 16 were free from B. Coli., in one sample the B. Coli were few in number, and in 3 samples B. Coli occurred with undue frequency, suggesting that this supply did not attain a standard of absolute safety.

Of the 13 samples of water examined from Batley, 11 showed either the absence of B. Coli or the presence of a very low number. This water is no longer in use in Dewsbury, the supply having been terminated during the year.

The chemical analysis (Table II.) shows that the sample of Halifax water, and the sample of the Dewsbury and Heckmondwike Waterworks Board water were satisfactory.

During 1938, arrangements were made with the Halifax Corporation for the water from Halifax to be filtered, and the water has since shown a higher degree of clearness and purity, with an almost complete absence of B. Coli.

The water from the Dewsbury and Heckmondwike Waterworks Board has been treated by the addition of slaked lime and chlorine and except for the short period during which three samples, shown in Table I., contained excessive numbers of B. Coli, has shown a satisfactory degree of purity. To attain the greatest possible degree of security, this supply should in addition to its treatment with chlorine, be treated by means of filtration.

I am greatly indebted to Mr. Boldry, the Water Engineer, for the information he has given to me, relating to the water supply of the Borough.

DRAINAGE and SEWERAGE.

Mr. Shaw, the Borough Engineer, has kindly supplied the following information.

There are four sewage works in the town. The main works at Mitchell Laithes were opened in 1928, and are highly efficient. They can deal with more than 3 million gallons of sewage daily and are capable of further extension. The works at Ravensthorpe are also modern and effective. There are two small works, one adjacent to Smithy Brook, and one at Millbank which deal with sewage from Thornhill and Savile Town.

1. Sewage Treatment (Year ended 31st March, 1939.)

(a) MITCHELL LAITHES WORKS. The total volume of sewage treated amounted to 1,241 million gallons, the average daily flow being 3,400,000 gallons.

(b) RAVENSTHORPE WORKS. The total volume of sewage treated was 304 million gallons, the average daily flow being 833,000 gallons.

(c) RIVERS BOARD SAMPLES. Five samples of final effluent from the Mitchell Laithes Works and five samples from the Ravensthorpe Works were obtained by the Rivers Board Inspector. In all cases the effluent was reported satisfactory.

2. Sewerage and Sewer Cleansing.

(a) The sewer at the rear of Lees Hall Road was rejoined and repaired for a length of 150 yards, and a broken surface water sewer repaired in Ossett Lane.

During the year, the reconstruction of the main Thornhill Lees Sewer between Slaithwaite Road and the railway was completed. This consisted of 270 yards of 27 ins. diameter concrete tubes laid in tunnel, and was part of the scheme for preventing surcharge of sewers in Thornhill Lees.

(b) CLEANSING OF SEWERS. The whole of the sewers in Ravensthorpe were dragged and cleansed.

Both the foul and surface water sewers in Bradford Road were cleansed from the boundary up to Northgate.

(c) GENERAL. Several new manholes have been built on existing sewers to provide better access and more efficient supervision.

Several storm water overflows have been constructed at various points to relieve the surcharging of the sewers during heavy storms. Extensive repairs were carried out to the arch and abutment walls of the Beck where it flows beneath the road in Longcauseway.

CLOSET ACCOMODATION.

Particulars of closet accommodation are printed in Table XIVA., page 61.

The following is a summary of the work of conversion from the conservancy system to the water carriage system during the last 5 years :—

	No. of closets converted to water carriage system during year		No. of closets on conservancy system at end of year
1938	...	2	265
1937	...	22	311
1936	...	21	342
1935	...	10	363
1934	...	17	373

It will be noticed that the number of closets on the conservancy system shows a much greater decrease than is accounted for by conversion. The difference is due to procedure under the Housing Act.

There are 15,433 closets in Dewsbury, and 98.3% of these are on the water carriage system. The number on the conservancy system is 265. It is interesting to recall that in 1911 the Medical Officer of Health reported that there were 10,740 closets in Dewsbury, of which 3,712 or 34.6% were on the conservancy system (privies and pails) and 7,028 or 65.4% on the water carriage system.

PUBLIC CLEANSING.

Particulars relating to the ashbins and ashpits of Dewsbury are printed in Table XIVB., page 61.

There are still about 600 ashpits in Dewsbury, which are costly to clean, and in many cases insanitary. The number of ashpits abolished and bins provided during the past 5 years is given below.

	Ashpits	Abolished.	Bins	Provided.
1938	38		125
1937	167		585
1936	245		1293
1935	257		1127
1934	177		807

The following is a summary of the cleansing services during 1938 :—

(a) Dry house refuse is collected by horse and mechanical vehicles in the ratio of 37% and 63%—the ratio being the same as in the two previous years.

(b) Refuse from earth closets and privies is collected by horse vehicles only.

(c) Dry house refuse is disposed of by controlled tipping.

(d) Refuse from earth closets and privies is also disposed of by controlled tipping.

(e) Cesspools are emptied by hand and their contents taken away in a watertight cart.

(f) The contents of cesspools are disposed of to farmers for agricultural purposes.

SANITARY INSPECTION OF THE AREA.

The report furnished to the Medical Officer of Health by the Chief Sanitary Inspector under article 19 of the Sanitary Officers Order, 1926, is printed on page 43, Table XV., page 62, and Table XVI., page 63.

SHOPS.

The four District Sanitary Inspectors are also Shops Inspectors, and are dealing with the work that has to be done under the Shops Acts, 1934.

SMOKE ABATEMENT.

The Sanitary Inspectors made 244 smoke observations during 1938, compared with 344 in 1937.

Records of the measurements of atmospheric pollution by means of soot deposit gauges are printed on Table XVII., page 65, and generally, they show a decrease compared with 1937.

THE PUBLIC BATHS.

The modernized baths, re-opened in 1937, contain two swimming baths, both 75 ft. by 25 ft. and each holding approximately 50,000 gallons of water, which is purified by chlorination and filtration. In addition there are Turkish and Slipper Baths.

In the year ending March 31st, 1939, over 95,000 persons were admitted to the baths, of whom over 26,000 were school children.

It is proposed to build an additional swimming bath on an adjacent site, at an estimated cost for the buildings of £30,600.

There are no other swimming baths in Dewsbury.

FACTORIES ACT, 1937.

This Act came into force on 1st July, 1938, replacing the Factory and Workshop Act, 1901. The term "workshop" disappears, only one term, "factory," being employed. A distinction, however, is drawn between factories where mechanical power is used and factories where mechanical power is not used. The Local Authority enforces the provisions relating to sanitary conveniences in all factories, whether mechanical power is used in the factory or not, and enforces the provisions relating to temperature, cleanliness, overcrowding, ventilation and drainage of floors in factories in which mechanical power is not used.

Particulars of inspections are printed in Table XXXIII., page 84.

SCHOOLS.

A report on the inspection of the Elementary Schools is included in the School Medical Report for 1938.

Information concerning the prevalence of infectious diseases amongst school children is given in Section F, page 38, of this report. The total number of children excluded through the school medical service in order to prevent the spread of infectious diseases was 172.

SECTION D.**HOUSING.**

Particulars relating to :—

- (1) Inspection of Dwellinghouses during 1938.
- (2) Remedy of Defects during 1938 without service of formal notices.
- (3) Action under Statutory Powers during 1938.
- (4) Overcrowding ; are presented in Table XVIII., page 66.

A summary of the Housing Programme and the progress that has been made with it is given in the following Tables :—

Table XXXIV., page 85, Summary of Housing Programme.

Table XXXV., page 85, Schedule of Clearance Areas.

Table XXXVI., page 86, Ward distribution of Clearance Areas and Individual Unfit Houses.

Table XXXVII., page 87, Summary of Action taken under the Housing Acts.

The last table is a Summary and time schedule showing the situation of each unfit house represented, and the progress made.

During 1938, following an inquiry, the Minister of Health confirmed the following clearance orders, made by the Council in 1937, covering 208 houses, and 618 occupants :—

		Houses.	Population.
Cliffe Street, Dewsbury	...	50	154
Dale St., Thornton Road, T. Lees.	...	15	39
Charlesworth St. Thornhill Lees	...	22	66
Lees Hall Road, Thornhill Lees	...	17	42
Thomas Street, Thornhill Lees	...	23	84
Edge Top Road, Thornhill	...	8	14
Briestfield Road, Thornhill	...	6	28
Low Road, Thornhill	...	10	16
Albion Road, Thornhill	...	13	48
Edge Road, Thornhill No. 1	...	20	60
Edge Road, Thornhill No. 2	...	7	23
Wells Road, Thornhill	...	17	44

In addition, Demolition Orders were made in respect of 41 individual unfit houses, and Closing Orders in respect of 26.

The following areas were declared to be Clearance Areas by the Council during 1938 :—

			Houses	Population.
Cooper Square	11	16
Providence Street, Thornhill Lees			25	85
Flatts No. 1	156	532
Princess Street, Swallow Road	...		47	97
EastborOUGH No. 1	249	790
Hill End (Earlsheaton)	32	91
Old Bank Road No. 1	14	27
Old Bank Road No. 2	9	22
			<hr/>	<hr/>
			543	1660
			<hr/>	<hr/>

The new houses built by the Corporation from the beginning of the original Five Years Programme to the end of 1938, consisted of the following :—

	Houses.
Dawgreen (Improvement Scheme)	18
Lees Holm	10
Pilgrim Farm	32
Conyer's Pit	16
Heckmondwike Road No. 1	22
Scopsley Lane, Whitley	30
Heckmondwike Road No. 2	74
Dawgreen Nos. 1 and 2	64
Heaton Lodge, Earlsheaton	108
The Croft, Earlsheaton	26
Lees Moor, Thornhill Lees	208
Dewsbury Moor	256
Earlsheaton Park	98
Mayne's Close	14
Overthorpe Park	200
	<hr/>
	1176
	<hr/>

Those in course of construction at the end of 1938 were :—

	Houses.
Overthorpe Park	182
Canterbury Road	150
	<hr/>
	332
	<hr/>

The number of new Corporation Houses completed in 1938 was 452. In 1937, the number completed was 178.

In preparation for further housing requirements, the Corporation have purchased, or agreed to purchase the following sites :—

		Acres.
School Lane, Dewsbury Moor	...	12
Green Lane Westborough	...	2
Adjoining Fir Cottages	...	15
Walnut Lane, Chickenley	...	24
		<hr/>
		53
		<hr/>

Overcrowding.

The number of families living under overcrowded conditions is now showing a marked diminution. The overcrowding survey begun in December, 1935, showed that 1194 working-class families were living in overcrowded conditions. At the end of 1938, exactly three years later, this number had dropped to 618, which is slightly more than 4% of the working-class families in Dewsbury. While this improvement is gratifying, it must be realised that this percentage is equal to that for the 83 County Boroughs of England and Wales at the time of the survey at the end of 1935. In other words, the work done in abating overcrowding, has now put Dewsbury in the position that average County Boroughs were in 3 years ago before starting their attack on overcrowding.

Common Lodging Houses.

There are two common lodging houses, containing 96 beds, in the Borough, and they prove sufficient for its needs.

Houses-Let-in-Lodgings.

There are 12 such houses in the town, half of which will be affected by the Housing Programme.

SECTION E.

INSPECTION AND SUPERVISION OF FOOD.

Milk Supply.

Inspections of Dairies, Cowsheds and Milkshops totalled 284 during 1938.

The following is an analysis of the register at December, 1938, of all persons carrying on the trade of cow-keeper or dairyman and of all farms and all other premises within the district which are used as dairies. Under the Milk and Dairies Order, 1926, it is necessary for the persons and premises mentioned to be registered with the Local Authority:—

MILK :

No. of Retail Purveyors	254
No. of Dairy Premises	65
No. of Producers and Cowkeepers	44
No. of Wholesalers on Register	17
No. of Cowsheds on Register	70

ICE CREAM :

The regulation of the manufacture and sale of ice cream is governed by the Dewsbury Corporation Act, 1918, Section 98.

No. of Premises for Manufacture	11
No. of Premises for Sale	6

The following licences under the Milk (Special Designations) Order, 1936, were in force within the Borough at the end of 1938 :

	Producers.	Bottlers.	Dealers.
Tuberculin Tested Milk	1	1	9
Accredited Milk	...	8	3

There were, in addition, three licences to pasteurise and three dealers' licences for pasteurised milk.

Meat and Other Foods.

The following is a summary of the work of the Sanitary Inspectors in relation to meat, slaughterhouses, shops, stalls, vehicles and other places where food is prepared:—

Inspections of Slaughterhouses	...	2,680
Unfit meat destroyed	...	12 tons, 4 cwts., 63 lbs.
Inspections of Food Premises, other		
than Slaughterhouses	...	191
Unfit food destroyed	...	6 cwts., 2 qrs. 11½ lbs.

Details of inspections under this heading are printed in Tables XX. and XXI., pages 68 and 69.

Adulteration of Food and Drugs.

Details of the work carried out by the Sanitary Inspectors and the Borough Analyst during 1938 are printed in Tables IV. and XXII., pages 50 and 70.

Chemical and Bacteriological Examination of Food.

Bacteriological examinations are carried out at the West Riding County Council Laboratory, Wakefield. Details of the work done are printed in Table III., page 49.

Chemical examinations are carried out by the Borough Analyst at his laboratory in Bradford. Details of the work done are printed in Tables IV. and XXII., pages 50 and 70.

Nutrition.

During 1938, 43,647 lbs. of milk food were distributed at the Welfare Centres, costing £2,545, towards which parents contributed £985, the balance of £1,560 representing the milk food distributed free or at reduced charges at the expense of the Corporation.

There were also 924 school children who received free milk and 393 who received free meals. In addition 400,000 one-third pint bottles of milk were purchased during the year by children in the schools at a cost of $\frac{1}{2}$ d. per one-third pint.

Free meals were also supplied to 8 Nursing or Expectant mothers during the year.

The subject of nutrition, and the value of suitable foods are kept constantly before parents at the clinics, and in the frequent talks which medical officers of the department give to societies and associations in the town.

SECTION F.

PREVALENCE OF AND CONTROL OVER INFECTIOUS AND OTHER DISEASES.

Particulars of the incidence of notifiable diseases during 1938 are printed in Table XXIII., page 71, with comparative figures for 1937.

Hospital Accommodation.

The Isolation Hospital at Mitchell Laithes contains 98 beds, including 8 cubicles, and all infectious diseases can be admitted.

Non-notifiable Infectious Diseases.

As these diseases are not notifiable, the Health Department has no accurate record of their incidence. Head teachers, however, notify such cases occurring in the schools, and as these diseases occur mainly in childhood, the notifications serve as a rough guide to their prevalence. There was an outbreak of measles during the year (complicated in a number of cases by broncho-pneumonia), as the following table, covering the past five years, shows:—

	1938	1937	1936	1935	1934
Measles	628	182	575	125	382
Whooping Cough	71	62	149	78	112
Chicken Pox ...	94	463	193	145	273
Mumps	25	207	194	58	18
Influenza	8	387	15	18	34
	826	1301	1126	424	819
	—	—	—	—	—

Diphtheria.

Detailed statistics relating to Diphtheria are printed in Table XXIV., page 72.

The number of cases of Diphtheria notified during 1938 was 61 and there were 2 deaths from the disease. In 18.0% of the cases the patients were under 5 years of age, in 24.6% they were between 5 and 9 years of age, in 23.0% they were between 10 and 14 years, and in 34.4% they were 15 years of age or over. The ages of the fatal cases were 18 months and 6 years.

The following is a summary of the incidence of Diphtheria and the mortality from it since 1910:—

Year.	Cases.	Deaths.
1910-15 average ...	41	6
1916-20 " ...	42	8.2
1921-25 " ...	33	3.8
1926-30 " ...	36	2
1931-35 " ...	157	15.8
1936	97	6
1937	92	9
1938 " ...	60	2

Immunization.

One child in every ten is likely to contract Diphtheria and of those who contract it, one in every ten is likely to die. The risk of contracting the disease can be greatly reduced, and the risk of dying from it almost abolished by artificial immunization. As the disease is largely one of childhood, early immunization is essential.

In 1938, 15 children under school age, and 11 children of school age, were immunized, making a total of 26. The preparation used was T.A.F. There are 10,000 children in Dewsbury of school age or under.

The proved value of immunization is brought constantly to the notice of the public, and it can be obtained without charge. It is probable that the population of Dewsbury spend £20,000 annually on patent medicines of unproved value, despite the fact that in the past patent medicines have been known to be sold to the public at prices which are 4,000% to 6,000% above the cost of the materials they contain. It would be interesting to see what the results would be if a child was given a coupon every time it was given an immunization injection, and three coupons could be exchanged for a free gift.

Scarlet Fever.

The number of cases was 121, and 117 were removed to Hospital. One case, aged $2\frac{1}{2}$ years, died.

The following table gives the number of cases and deaths in recent years :—

Year.		Cases.	Deaths.
1926-30	average	104	0.6
1931-35	"	233	1.8
1936	...	88	0
1937	...	130	1
1938	...	121	1

Enteric Fever.

One case was notified and the patient recovered. His home was in Birstall, and he was admitted to Staincliffe County Hospital where the nature of his illness was discovered.

The number of cases and deaths in recent years is given in the table below :—

Year.		Cases.	Deaths.
1926-30	average	2.4	0
1931-35	"	1.2	0.4
1936	...	3	0
1937	...	0	0
1938	...	1	0

Puerperal Pyrexia.

Nine cases occurred during the year. Four cases were removed to Mitchell Laithes, and 4 developed the condition in the County Hospital, where they were nursed.

None of these 8 cases died. The one death from puerperal sepsis which appears in the Dewsbury returns was a Dewsbury resident who died in another town, following an abortion.

The notifications and deaths from Puerperal Fever and Pyrexia in recent years are given below:—

Year.		Cases.	Deaths.
1926-30	average	...	8
1931-35	"	...	5.8
1936	12
1937	8
1938	8

Ophthalmia Neonatorum.

Five cases were notified, but in no case was there any resulting impairment of vision. The numbers of notifications in recent years are given below:—

Year.		Cases.
1921-25	average	...
1926-30	"	9
1931-35	"	6.6
1936	...	2
1937	...	8
1938	...	5

Tuberculosis.

Particulars of new cases of Tuberculosis and deaths from the disease, Tuberculosis Returns as furnished to the Ministry of Health, and the occupations of those who died of the disease during 1938, are given in Tables XXVII., XXVIII. XXIX. and XXX., pages 74 to 80.

No action was found to be necessary under the Public Health (Prevention of Tuberculosis) Regulations, 1925, or under Section 172 of the Public Health Act, 1936.

During 1938, 80 new cases of Tuberculosis were notified (51 pulmonary and 29 non-pulmonary), and there were 22 deaths (16 pulmonary and 6 non-pulmonary), giving a death rate of 0.41 per 1,000 (0.30 pulmonary, and 0.11 non-pulmonary).

The following table shows the number of notifications and deaths from pulmonary and non-pulmonary Tuberculosis since 1912, when compulsory notification came into force.

Year	Notifications.			Deaths.		
	Pulmon- ary	Non- Pulmon- ary	Total	Pulmon- ary	Non- Pulmon- ary	Total
1912-1915 (average)	107.5	31.7	139.2	51.8	16.8	68.6
1916-1920 (average)	97.4	15.6	113	42.4	11.6	54
1921-1925 (average)	43.6	9.4	53	33.6	9.2	42.8
1926-1930 (average)	38.6	15.2	53.8	36.6	9.4	46
1931-35 (average)	41.4	18.8	60.2	32.2	7.4	39.6
1936 ...	42	23	65	24	12	36
1937 ...	55	22	77	22	8	30
1938 ...	51	29	80	16	6	22

It will be seen that in 1938, the number of deaths from Tuberculosis was less than a third of what it was only 25 years ago.

For the past seven years, the death rate per 1,000 population from Tuberculosis in Dewsbury has been less than that for England and Wales, as the following table shows:—

Year.	England & Wales.		Dewsbury.	
	Death Rate.	Deaths.	Death Rate	Deaths.
1932	... 0.83	... 38	0.70	
1933	... 0.82	... 27	0.50	
1934	... 0.76	... 38	0.71	
1935	... 0.72	... 36	0.67	
1936	... 0.69	... 36	0.67	
1937	... 0.69	... 30	0.57	
1938	... 0.64	... 22	0.41	

Of the 6 deaths from non-pulmonary tuberculosis, 4 were of children under 15 years of age. Of the 16 deaths from pulmonary tuberculosis, 15 were of persons over 15 years of age.

If patients who have contracted tuberculosis are to have a good chance of recovering, they must obtain treatment in the early stages of the disease. The following figures show the periods which elapse between the notification of cases of tuberculosis who subsequently die, and the date of death:—

		1938	1937
		Per cent.	Per cent.
Cases not notified at all 18.2	16.7
Cases notified after death 4.5	3.3
" " 1 to 7 days before death	...	9.1	3.3
" " 1 to 4 weeks	..."	9.1	10.0
" " 4 to 12 weeks	..."	18.2	6.7
" " 3 to 6 months	..."	18.2	3.3
" " 6 to 9 months	..."	9.1	3.3
" " 9 to 12 months	..."	0.0	53.3
" " over 1 year before death	...	13.6	0.0

In 1938, 77.3% of those who died from tuberculosis either had not been notified at all as suffering from tuberculosis, or were notified less than six months before they died. In the majority of cases, this means that they delayed seeking medical advice until the disease was far advanced.

In an effort to discover early cases of the disease, those in contact with known cases are examined, and last year, among 52 contacts examined, 7 were found to have tuberculosis.

Whitley Sanatorium, which has accommodation for 32 patients has been kept full during the year, but usually there has been no undue delay in admitting patients.

Under the arrangement which exists for the admission of cases of non-pulmonary tuberculosis and pulmonary cases requiring special treatment to other institutions approved by the Ministry of Health, Dewsbury Corporation was maintaining at the end of the year the following 14 patients in the institutions named:—

	Male	Female	Children	Total
Papworth Sanatorium and Colony	2	1	—	3
Thorparch	—	—	1	1
King Edward VII. Hospital Sheffield	—	—	5	5
Orthopaedic Hospital, Oswestry	1	4	—	5

Pneumonia.

There were 29 deaths from this disease in 1938, compared with 36 deaths in 1937. Of these 6 were of children under 5 years of age, compared with 12 of children of the same age in 1937.

Erysipelas.

There were 23 cases and no deaths in 1938, compared with 20 cases and 1 death in 1937. Of the 23 cases, 11 were removed to the Isolation Hospital, Mitchell Laithes, and 1 to Staincliffe County Hospital. The remaining cases were not considered to require removal to hospital.

Smallpox.

No cases of Smallpox occurred in 1938.

Only 8.2% of children born in 1938 were vaccinated.

Disinfection and Disinfestation.

Disinfection and disinfection of persons, clothing and bedding is carried out at the Cleansing Station attached to the Municipal Buildings, Halifax Road, Dewsbury.

Prevention of Blindness.

No special arrangements were made by the Local Authority under section 176 of the Public Health Act, 1936.

Venereal Diseases.

Free treatment for Venereal Diseases is supplied by the Dewsbury Corporation in conjunction with the West Riding County Council at a clinic held at the Dewsbury and District General Infirmary under the supervision of Dr. G. Foster Smith.

The new patients dealt with in 1938 numbered 147 (114 males and 33 females). Of these, 62 resided in Dewsbury, and 85 in the West Riding. The total number of attendances at the Clinic was 6,248 of which 2,456 were made by Dewsbury residents.

Detailed statistics are printed in Table XXXI., pages 81 to 83.

Cancer.

The number of deaths from Cancer in 1938 was 93, a decrease of 9 on the previous year, giving a death rate from Cancer of 1.76 per 1,000, compared with 1.66 for England and Wales. Details are given in Tables XXV. and XXVI., page 73. The age and sex distribution of the deaths was as follows:—

	15-	25-	35-	45-	55-	65-	75-	all ages
Males	—	—	—	6	9	15	4	34
Females	—	1	7	10	14	21	6	59
Total	—	1	7	16	23	36	10	93

There are facilities for the diagnosis and surgical treatment of cancer at the Dewsbury & District General Infirmary and at the Staincliffe County Hospital, but neither hospital has facilities for treatment by X-Ray Therapy or Radium. When such treatment is considered necessary the patients are referred to the Leeds General Infirmary.

REPORT OF THE CHIEF SANITARY INSPECTOR.

Mr. Chairman, Mrs. Hinchliffe and Gentlemen,

I beg to submit the Annual Report on the work of the Sanitary Department for the year 1938.

The operation of new legislation provided the opportunity for a complete revision of records internally and on the district which gives a sound statistical measurement of the work done.

Housing still exerts a dominant demand on the services of the inspectorial staff involving, in the year under review, the detailed survey and preparation of plans for the clearance of 543 houses. To a considerable extent this continued housing survey functions as an inspection of the district under the Housing (Consolidated) Regulations 1925-1932, but as and when the housing inspection staff is supplemented, more attention will have to be directed to the older properties in the borough, which, while not so far below standard as to warrant consideration for clearance, need some attention for their betterment.

Inspections.

The total number of all classes of inspections was 25,530. Table XV., page 62, gives the classification of these inspections.

Notices.

454 informal notices were served during 1938 in respect of contraventions of statutes at 842 houses or premises. 24 formal notices were served in respect of 24 premises.

Sanitary Improvements.

General improvements are shown in tabular form on pages 63 and 66.

Drainage.

Drainage work on new and existing buildings is supervised and tested by the sanitary inspectors. A plan record is kept of all exposed sections which facilitates any subsequent work on drainage systems. The work is done with particular care and thoroughness, mindful of the responsibility attaching to the large Corporation Estates built. During 1938, 7,451 yards of drainage were tested.

A strictly literal interpretation of the new Model Bye-laws of the Ministry of Health, will, I feel sure, militate against the expediency of drainage work as executed in Dewsbury and I would respectfully appeal that present arrangements should not be disturbed.

Factories.

The Factory & Workshops Act, 1901, was superseded by the Factories Act, 1937, as from the 1st July, 1938, which involved an appreciable increase in the work done in this section. Inspections numbered 227 during 1938, as against 115 in 1937.

Schools.

10 routine inspections of schools were made to secure sanitary improvement.

Rats and Mice Destruction.

A bad infestation was found during the year in an area which had been scheduled for consideration under the Housing Acts. During National Rat Week the same publicity was given as in previous years with the additional broadcast of posters on public cleansing vehicles by the kind co-operation of the Cleansing Superintendent.

Disinfection.

The central plant at the Municipal Buildings operated for the steam disinfection of bedding and clothing from cases of infectious disease and the steam disinfestation of bedding, clothing and soft furnishings from houses, the tenants from which were transported to new Corporation houses.

Eradication of Bed Bugs.

25 privately owned houses and 2 Corporation houses were disinfested by the Department during the year.

In the organisation of this work, Dewsbury has anticipated the framing of the Hydrogen-Cyanide (Fumigation of Buildings) Regulations 1938 and the Hydrogen-Cyanide (Fumigation) Act, 1937. It had since May, 1935, been an established rule in the Department that no house should be disinfested by Hydrogen-Cyanide unless this could be done to a natural boundary and the houses vacated until safely habitable. Disinfestation by this process is applied to the furniture and effects of all tenants transferred to Corporation houses.

The method of disinfestation applied to houses where it is impracticable to use HCN is as follows :—

Walls stripped of old paper.

Removable woodwork taken down and individually sprayed.
Crevices sprayed.

Bedding and soft furnishings removed for steam disinfection.
Sealing for fumigation.

Fumigation by burning sulphur (1-lb. for 200 cu. ft.).
House opened at expiration of twenty-four hours.

Atmospheric Pollution.

Two hundred and forty-four half-hourly observations of chimneys were taken during 1938. Eight informal notices of offence requiring abatement were served.

Four soot deposit gauges are positioned North, South, East and West of the town centre and a sulphur deposit gauge within a short radius of the industrial centre.

The mean monthly deposit of total solids at the Whitley station for 1938, was 152% of the general average for that station, which leads to the supposition that smoke is travelling to this point from those factories in the line of the prevailing wind.

Common Lodging Houses.

There are two existing common lodging houses, one registered for 42 beds, the other for 54 beds. The basement rooms of one of the common lodging houses were the subject of action under the Housing Acts.

In the course of inspections it was found necessary to request the attendance of one of the lodgers, who was badly infested with lice, at the Municipal Cleansing Station, and all bedding used was disinfested by steam.

Houses-Let-in-Lodgings.

The majority of this type of dwelling, of which there is an estimated number of 12, come within the scope of action under the Housing Acts. It may generally be assumed that there is not any type of house in Dewsbury suitable for use for this purpose.

Offensive Trades.

Fourteen such trades are established in the County Borough, in respect of which no complaint was received during the year.

Rag Flock Acts, 1911 and 1928.

Two Samples of rag flock were submitted during the year for analysis and chlorine content was reported as 14 parts and 23 parts per million.

INSPECTION AND SUPERVISION OF FOOD.

Milk Supply.

There are 44 producers in the County Borough, of these 1 produces Tuberculin Tested milk from an Attested Herd, and 7 produce Accredited Milk. Sterilising equipment is made a condition precedent to the granting of licence to produce Accredited Milk. In addition there are 2 pasteurising establishments at which check samples are taken of raw milk at very frequent intervals. There is thermostatic control in each plant and thermographs, with check thermometers, on the hot and the cold sections of the heat exchanges (A.P.V.), and on the outlet pipe of the holder.

One hundred and fifteen samples were taken for bacteriological and biological examination. It is a standing rule that samples submitted primarily for bacteriological examination are at the same time submitted to biological test for B. Tuberculosis.

Meat Inspection.

All meat killed within the County Borough is inspected by the sanitary inspectors, who undertake duty for the evening markets on Wednesday and Saturday, slaughterhouse inspection on Sunday and on each of the public holidays.

A Meat Marking Scheme is in operation under the Public Health (Meat) Regulations, 1924.

Meat surrendered by local butchers is collected by the Department, and its disposal is supervised by the district sanitary inspectors.

In the course of the routine inspection of markets meat was seized on 2 occasions from 1 stall. Convictions were recorded in both instances with fines totalling £50, and the tenancy of the stall was subsequently determined by the Corporation.

Inspection of Other Foods.

There were 4,223 inspections of market stalls and shop premises for food other than meat, and 6 cwts. 2 qrs. 11½ lbs. of foodstuffs was surrendered during the process of these inspections.

Food Adulteration.

Two hundred and thirty-four samples were taken during the year. All the sanitary inspectors are appointed Sampling Officers. Two prosecutions taken during the year were dismissed by the Magistrates.

In conclusion, I would express my appreciation of the direction of members of the Council, and tender to my colleagues thanks for the creditable work they have done.

I am,

Your obedient Servant,

R. W. McDONALD.

Chief Sanitary Inspector.

TABLE VII.

Maternity and Child Welfare.

I.—RETURN TO BE MADE BY ALL WELFARE AUTHORITIES.

1.	Population of the area served by the Council (1938)	52860
2.	Number of births notified in that area during the year under the Notification of Births Act, 1907, as adjusted by any transferred notifications :	
(a)	Live Births	793
(b)	Still Births	28
(c)	Total	821
(d)	By Midwives	731
(e)	By Doctors and Parents	90
3.	Health Visiting.	
(i)	Number of Officers employed for health visiting at the end of the year :	
(a)	by the Council	4
(b)	by Voluntary Associations	—
(ii)	Equivalent of whole-time services devoted by the whole staff to health visiting (including attendance at infant welfare centres)—	
(a)	in the case of Health Visitors employed by the Council	100%
(b)	in the case of Health Visitors employed by Voluntary Associations	—
(iii)	Number of visits paid during the year by all Health Visitors :	
(a)	to expectant mothers—	
	First visits	383
	Total visits	593
(b)	to children under 1 year of age—	
	First visits	773
	Total visits	4915
(c)	to children between the ages of 1 and 5 years—	
	Total visits	11588
4.	Infant Welfare Centres.	
(a)	Number of Centres provided and maintained by the Council	4
(b)	Number of Centres provided and maintained by Voluntary Associations	—
(c)	Total number of attendances at all Centres during the year:	
(i)	by children under 1 year of age	23423
(ii)	by children between the ages of 1 and 5 years ...	8422
(d)	Total number of children who attended at the Centres for the first time during the year and who, on the date of the first attendance, were—	
(i)	under 1 year of age	685
(ii)	between the ages of 1 and 5 years	23
(e)	Total number of children who attended at the Centres during the year and who, at the end of the year, were—	
(i)	under 1 year of age	598
(ii)	between the ages of 1 and 5 years	442
(f)	Percentage of notified live births represented by the number in (d) (i)	86.3%

5. Ante-natal and Post-natal Services.

(a) Ante-natal and Post-natal Clinics (whether held at Infant Welfare Centres or at other premises) :

		Ante- Natal.	Post- Natal.
(i) Number of Clinics provided and maintained by the Council	2	1
(ii) Number of Clinics provided and maintained by Voluntary Associations	—	—
(iii) Total number of attendances at all Clinics during the year	1631	44
(iv) Total number of women who attended at the Clinics during the year	708	18
(b) Total number of expectant mothers ante-natally examined and of cases post-natally examined during the year, under arrangements made by the Council with private medical practitioners, excluding cases included under 5 (a) (iv)	—	—
(c) Percentage of total notified births (live and still) represented by the total numbers of women shown under 5 (a) (iv) and 5 (b)	86.2	2.19

6. Supply of Milk and Food.

(a) Indicate what arrangements are made for this service by inserting "Yes" or "No" in each space in the following table :—

Terms of supply	Expectant Mothers	Nursing Mothers	Children under 5 years of age
Milk—			
Free, or at less than cost price, in necessitous cases	Yes	Yes	Yes
At cost price in other cases (e.g., sale of dried milk at Centres)	Yes	Yes	Yes
Meals supplied at Dining Centres—			
Free, or at less than cost price, in necessitous cases	Yes	Yes	No.
At cost price in other cases (e.g., sale of dried milk at Centres)	No	No	No
Other Food—			
Free, or at less than cost price, in necessitous cases	Yes	Yes	Yes
At cost price in other cases (e.g., sale of dried milk at Centres)	Yes	Yes	Yes

(b) Total quantity of milk supplied during the year to expectant and nursing mothers and young children :—

	Liquid	Dried
	gallons	pounds
(i) By the Council	Nil	43647
(ii) By Voluntary Associations operating in the area of the Council	Nil	— —
Totals	Nil	43647

7.	Maternity Homes and Hospitals.					
	Separate maternity institutions provided by the Council					
	Number of Institutions	1
	Number of maternity beds (exclusive of isolation and labour beds)	12
	Total number of women admitted to these beds during the year	299
	Number of beds (included in the figures above) allocated to, and reserved for, expectant mothers in need of hospital treatment	1
	Number of women sent by Council during the year to other Maternity Institutions	98
8.	Homes for Mothers and Babies.					
(a)	Number of such homes :					
(i)	Provided by the Council	—
(ii)	Provided by Voluntary Associations	—
(b)	Total number of such cases sent by the Council during the year to other homes for mother and babies	28
9.	Day Nurseries.					
(a)	Number of day nurseries :					
(i)	provided by the Council...	—
(ii)	provided by Voluntary Associations	1
(b)	Number of places for children under 5 years of age in the nurseries :					
(i)	provided by the Council...	—
(ii)	provided by Voluntary Associations	50
(c)	Total number of attendances of children at these nurseries during the year	2850
	Do.	do.	do.	...	Full half-day	172
10.	Infectious Diseases.					

Disease.	Number of cases notified during the year	Number of cases visited by officers of the Council	Number of cases for whom home nursing was provided by the Council	Number of cases removed to hospitals
(1) Ophthalmia Neonatorum	5	—	—	5
(2) Pemphigus Neonatorum	—	17	12	5
(3) Puerperal fever	—	—	—	—
(4) Puerperal pyrexia	8	—	—	8
(5) Measles and german measles (in children under 5 years of age)	—	—	—	—
(6) Whooping Cough (do.)	—	—	—	—
(7) Epidemic diarrhoea (do.)	—	—	—	—
(8) Poliomyelitis (do.)	—	—	—	—

Information as to the number of cases of Ophthalmia Neonatorum notified during the year in which :—

(a) Vision was unimpaired	4
(b) " impaired	—
(c) " lost	—
(d) the patient was still under treatment at the end of the year	...					—
(e) " died	—
(f) " removed from the district	1
(g) Classification under the above heads cannot be made	...					—

Total 5

11.	Home Nursing.							
	(a) Number of nurses employed at the end of the year for the nursing of expectant mothers and children under 5 years of age, maternity nursing, or the nursing of puerperal fever :							
	(i) By the Council	—
	(ii) By Voluntary Associations	—
	(b) Total number of cases attended during the year by these nurses	—
12.	Consultants.							
	Number of cases in which the services of a consultant have been provided during the year for a private medical practitioner under the Council's maternity arrangements	19
13.	Home Helps.							
	Number of cases in which home helps have been provided during the year (the numbers of cases where this assistance has been given by Voluntary Agencies, by arrangement with the Council, should, if possible, be stated separately)	4
	By Voluntary Agencies	—
14.	Maternal Deaths.							
	(a) Number of women who died in, or in consequence of, child-birth in the area served by the Council for maternity and child welfare during the year :							
	(i) from sepsis	1
	(ii) from other causes	2
	(b) Number of these cases which died :							
	(i) at home	—
	(ii) in institutions	3
15.	Administration of Part I. of the Children Act, 1908, as amended by Part V. of the Children and Young Persons Act, 1932.							
	(a) Number of persons on the Register who were receiving children for reward at the end of the year	8
	(b) Number of children on the Register :							
	(i) at the end of the year	8
	(ii) who died during the year	—
	(iii) on whom inquests were held during the year	—
	(c) Number of Infant Protection Visitors at the end of the year who were :							
	(i) Health Visitors	4
	(ii) Female, other than Health Visitors	—
	(iii) Male	—
II.—RETURN TO BE MADE BY EACH LOCAL SUPERVISING AUTHORITY UNDER THE MIDWIVES ACTS IN RESPECT OF THE WHOLE OF THE AREA FOR WHICH THE COUNCIL ACT AS SUCH AUTHORITY.								
1.	Total number of Midwives practising at the end of the year in the area of the Local Supervising Authority :							
	(a) Employed by the Local Supervising Authority	4	3	7				
	(b) Employed by other Welfare Councils :							
	(i) under arrangements made with the Local Supervising Authority in pursuance of Section 1 of the Midwives Act, 1936	...	—	—	—	—		
	(ii) others	6	6
	(c) Employed by Voluntary Associations :							
	(i) under arrangements made with the Local Supervising Authority in pursuance of Section 1 of the Midwives Act, 1936	...	—	—	—	—		
	(ii) others	—	—
	(d) In private practice	—	—
	Totals	4	9	13			

2. Number of cases in the area of the Local Supervising Authority attended during the year by midwives :

(a) Employed by the Council	As Midwives... ...		327	293	620
	As Maternity Nurses		—	—	—
(b) Employed by other Welfare Councils :					
(i) under arrangements made with the Local Supervising Authority in pursuance of Section I of the Midwives Act, 1936	As Midwives ...		—	—	—
	As Maternity Nurses		—	—	—
(ii) others ...	As Midwives... ...		—	184	184
	As Maternity Nurses		—	—	—
(c) Employed by Voluntary Associations :					
(i) under arrangements made with the Local Supervising Authority in pursuance of Section I of the Midwives Act, 1936 ...	As Midwives... ...		—	—	—
	As Maternity Nurses		—	—	—

TABLE XVIII.
Housing Statistics.

1.—Inspection of Dwelling-houses during the Year :—					
(1) (a) Total number of dwelling-houses inspected for defects (under Public Health or Housing Acts)	3516				
(b) Number of inspections made for the purpose	10155				
(2) (a) Number of dwelling-houses (included under sub-head (1) above) which were inspected and recorded under the Housing Consolidated Regulations, 1925 ...	452				
(b) Number of inspections made for the purpose	1047				
(3) Number of dwelling-houses found to be in a state so dangerous or injurious to health as to be unfit for human habitation	76				
(4) Number of dwelling-houses (exclusive of those referred to under the preceding sub-head) found not to be in all respects reasonably fit for human habitation	170				
2.—Remedy of Defects during the Year without service of formal Notices :—					
Number of defective dwelling-houses rendered fit in consequence of informal action by the Local Authority or their Officers	692				
3.—Action under Statutory Powers during the Year :—					
(a) Proceedings under sections 9, 10 and 16 of the Housing Act, 1936 :					
(1) Number of dwelling-houses in respect of which notices were served requiring repairs	Nil.				
(2) Number of dwelling-houses which were rendered fit after service of formal notices :—					
(a) By owners	Nil.				
(b) By Local Authority in default of owners	Nil.				
(b) Proceedings under Public Health Acts :					
(1) Number of dwelling-houses in respect of which notices were served requiring defects to be remedied	868				
(2) Number of dwelling-houses in which defects were remedied after service of formal notices :—					
(a) By owners	13				
(b) By Local Authority in default of owners	2				
(c) Proceedings under sections 11 and 13 of the Housing Act, 1936 :					
(1) Number of dwelling-houses in respect of which Demolition Orders were made	100				
(2) Number of dwelling-houses demolished in pursuance of Demolition Orders	55				
(d) Proceedings under section 12 of the Housing Act, 1936 :					
(1) Number of separate tenements or underground rooms in respect of which Closing Orders were made	31				
(2) Number of separate tenements or underground rooms in respect of which Closing Orders were determined, the tenement or room having been rendered fit	Nil.				
4.—Housing Act, 1936.—Overcrowding :—					
(a) (1) Number of dwellings overcrowded at the end of the year	602				
(2) Number of families dwelling therein	618				
(3) Number of persons dwelling therein	3590				
(b) Number of new cases of overcrowding reported during the year	6				
(c) (1) Number of cases of overcrowding relieved during the year ...	122				
(2) Number of persons concerned in such cases	685				
(d) Particulars of any cases in which dwellinghouses have again become overcrowded after the Local Authority have taken steps for the abatement of overcrowding	Nil.
